Spanish: Native
English: B1

ABOUT ME

Systems Engineer with experience in web development. I am a creative person, fast learner and I have great interest in web application development. I like to be constantly learning new technologies

PROJECTS

Web page development

- I developed the e-commerce platform for the entrepreneurship "Flamma" using the PHP framework Laravel.
- My degree project was based in the creation of an e-commerce website that allowed entrepreneurs from the Universidad Industrial de Santander to publish and sell their products. This platform was implemented with Laravel, Livewire, MySQL, Redis and Tailwind CSS.

Proyectos personales

- Projects with React where API's are consumed, and made pagination, search engines and filters.

EDUCATION

Systems Engineering

Universidad Industrial de Santander | March 2017
